

Solution 880 Security System

Security Systems

Security you can rely on

BOSCH

Superior Performance

You have worked hard for the things you own, your home is your sanctuary. Ensuring your protection, the Solution 880 security system provides sophisticated electronic surveillance for your home or business. Incorporating the very latest in microprocessor technology, the Solution 880 has unsurpassed features combined with superior reliability and performance. The Solution 880 has been designed with flexibility and individual style in mind. BOSCH Security Systems have a complete range of products to suit your home or business providing **security you can rely on**

Peace of Mind

Your Bosch Security System can give you peace of mind. Whether away or at home the Solution 880 can provide additional protection against threats to your life and property. The Solution 880, when used with a monitoring service, can provide responsive assistance when you need it most for your precious family and the assets you have worked hard to own.

Simplicity of Use

To operate, all it takes is "one touch". By simply holding the #AWAY key you can arm your system in Away mode. To disarm simply enter your 4 digit code followed by #AWAY.

Security Systems are an investment for the future safety of your home and loved ones. Enjoy the peace of mind that your security system is always working to its optimum level with the ability to periodically test with a single button. Simply press and hold the '1' key to test the operation of the horn speaker, press and hold '2' to test the internal screamer or press and hold the '3' key to verify that the strobe unit works as expected.

Modern and Stylish Codepad

The Solution 880 allows you to choose from either a LED or ICON Code pad. These small and unobtrusive codepads will compliment the décor of any home.

Simple ICONS or indicators make it easy to identify the status of your system at all times.

ON or #AWAY indicates that your system is armed and ready to protect your home when you are away .

ON or *Stay indicates that your system is armed and ready to protect your home in Stay mode.

Easy Arming Option

The Solution 880 can be programmed to use a wireless remote that is small and can fit on your keyring. These small remotes allow you to arm and disarm your home as you leave by pressing one simple button.

The wireless remote can also be used to set the system in Stay mode, act as a portable panic button and can even be used to switch lights or open garage doors.

Added Security

Night Arm Stations can be added to the Solution 880 unit providing added security and protection from the convenience of your bedside. You can arm and disarm the system at the touch of a button and it also has an easy to operate built in panic function.

Convenience

If programmed, automatic call diversion will automatically divert your alarm messages to another number when you leave your premises. When you return and disarm call divert is automatically cancelled. Never miss that important call again.

Flexible Security

The Solution 880 has eight fully programmable zones, which can be used to monitor for intrusion, fire, system tamper events or panic buttons.

Your Solution 880 can be programmed to provide various output configurations such as lighting control, garage doors or operating electric locks. It also has unique siren sounds for smoke detection devices.

Reliability You Can Trust

The Solution range of panels have been market leaders for over twenty years. Designed in Australia, they represent thousands of man hours of development using an on-going process of customer feedback engineered into systems every year. The result is a tried, tested and continually enhanced system that is built to provide years of trouble free performance...what you expect from Bosch.
